Revolutionising logistics.

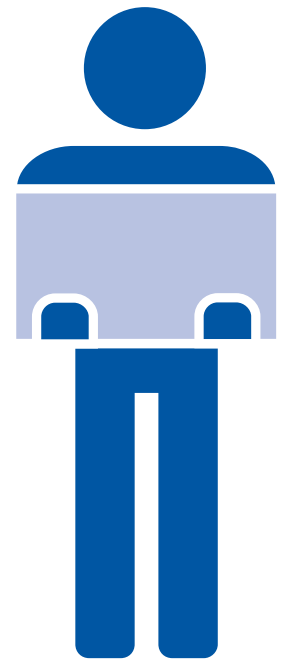

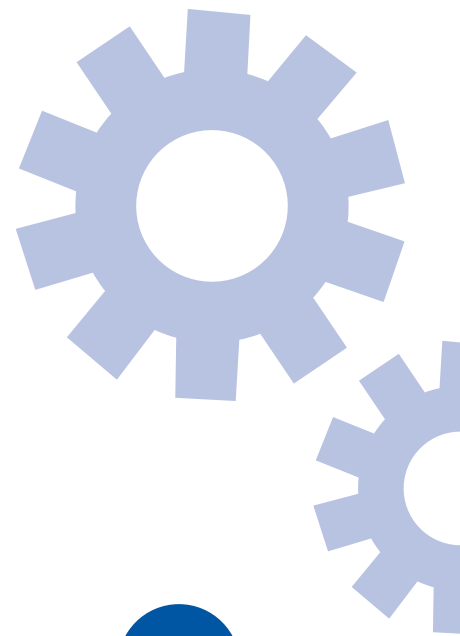

Sometimes an idea comes along that is so stunningly innovative, so breathtakingly simple that it changes everything. DX ParcelXchange is just such an idea in the field of logistics.

ParcelXchange is a revolutionary system of 35 intelligent electronic locker stations placed strategically across Ireland, in locations that are accessible 24/7. These stations comprise of 12 to 24 lockers of small, medium and large sizes to meet your changing business needs. Simply choose the locker location that is most convenient for your customers or field engineers.

It's clever, but here's the really intelligent bit. DX can pick up from your business before 18h00 and deliver to your dedicated locker before 09h00 with automatic tracking all the way. Customers decide a collection time convenient for them with access to the locker via a identification card and PIN number. It's brilliantly simple.

The benefit of ParcelXchange

This system of intelligent locker stations is unique to DX in Ireland. Which means it gives your business a huge advantage in terms of customer retention and acquisition.

It's faster, more secure, more convenient. It has inbuilt reverse logistics where required.

All of this makes it an ideal system for distributing parts, stock and equipment to field-based personnel such as engineers, technicians and sales staff. The average time for an engineer to collect two parcels from a locker is less than thirty seconds and late injection times are available.

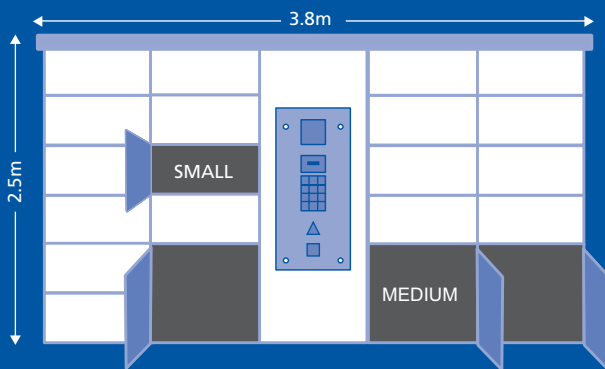

All of which means productivity is dramatically increased for you and your customers.

By availing of DX's airbridge connections with the UK and Europe, ParcelXchange can help reduce your Irish stock holding. Freight will be delivered to any ParcelXchange in the Republic of Ireland before 09h00.

Productivity	Intelligent Tracking	Reverse Logistics	24/7 Access	24/7 Support
 <p>Reaching your staff quickly and conveniently, wherever they may be, is now a reality with DX ParcelXchange. Not only because we provide nationwide coverage, but also the technology behind our system keeps your goods secure in our intelligent lockers. This means staff can collect items at a time that's convenient to their working day, helping them to work harder and faster.</p>	 <p>Controlled by a central intelligent console, each locker is part of the integrated track and trace system called Softlocker, which is accessible online. Reporting and data searching functions are available 24/7. For larger volumes, full integration with your IT system is also available.</p>	 <p>Parts returns are no longer a problem. Engineers can send returns back to a selection of locations (including warehouse, warranty sites, stores, recycling centres) through any ParcelXchange in the Republic of Ireland. As each return is barcoded using the integral printer at the ParcelXchange, full traceability is again assured.</p>	 <p>Every suite of lockers is available for deliveries and collections 24 hours a day, which gives you and your customers total convenience and flexibility.</p>	 <p>ParcelXchange is a 24 hour service. Anything we pick up from you before 18h00 will be delivered before 09h00. Hub injections are allowed up to 22h00. Our 24 hr Call Centre is also available to help you at any time, where Customer Support has the capability to open lockers remotely.</p>

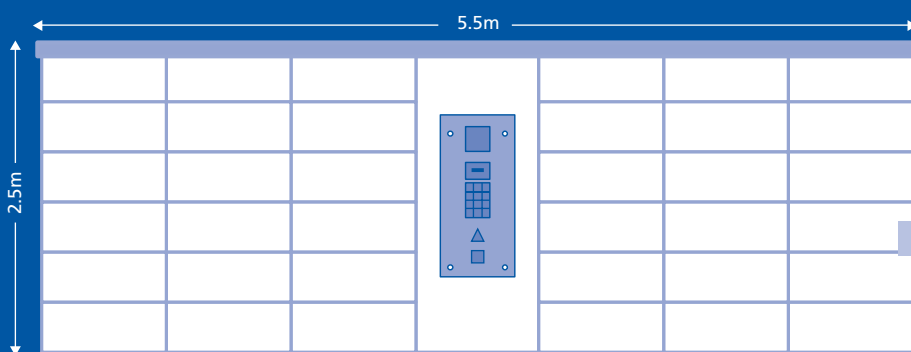

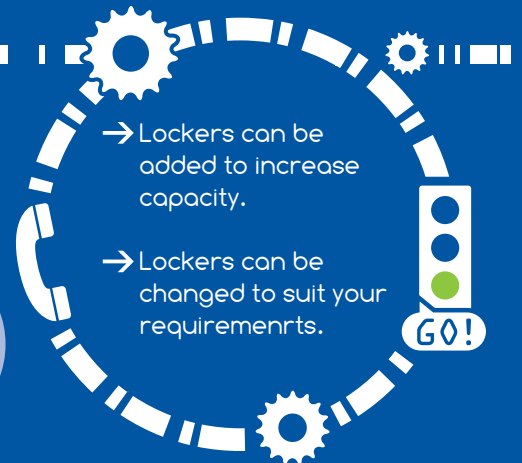

Intelligent lockers

Each locker is more than just a storage space; it's an amazing piece of hi-tech kit. Our locker hiring policy is equally intelligent. You can take one on either a permanent or as-you-need-it basis.

BOX SIZE	W x D x H
SMALL	750 x 800 x 300
MEDIUM	750 x 800 x 600
LARGE	750 x 800 x 900

← 24 LOCKERS

 30 seconds

the average time for an engineer to collect two parcels from a locker

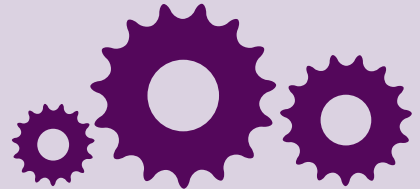

Amazing technology

Each ParcelXchange contains an integrated barcode scanner, allowing the recipient to insert an identification card and effectively 'sign' for the goods, completing the tracking trail.

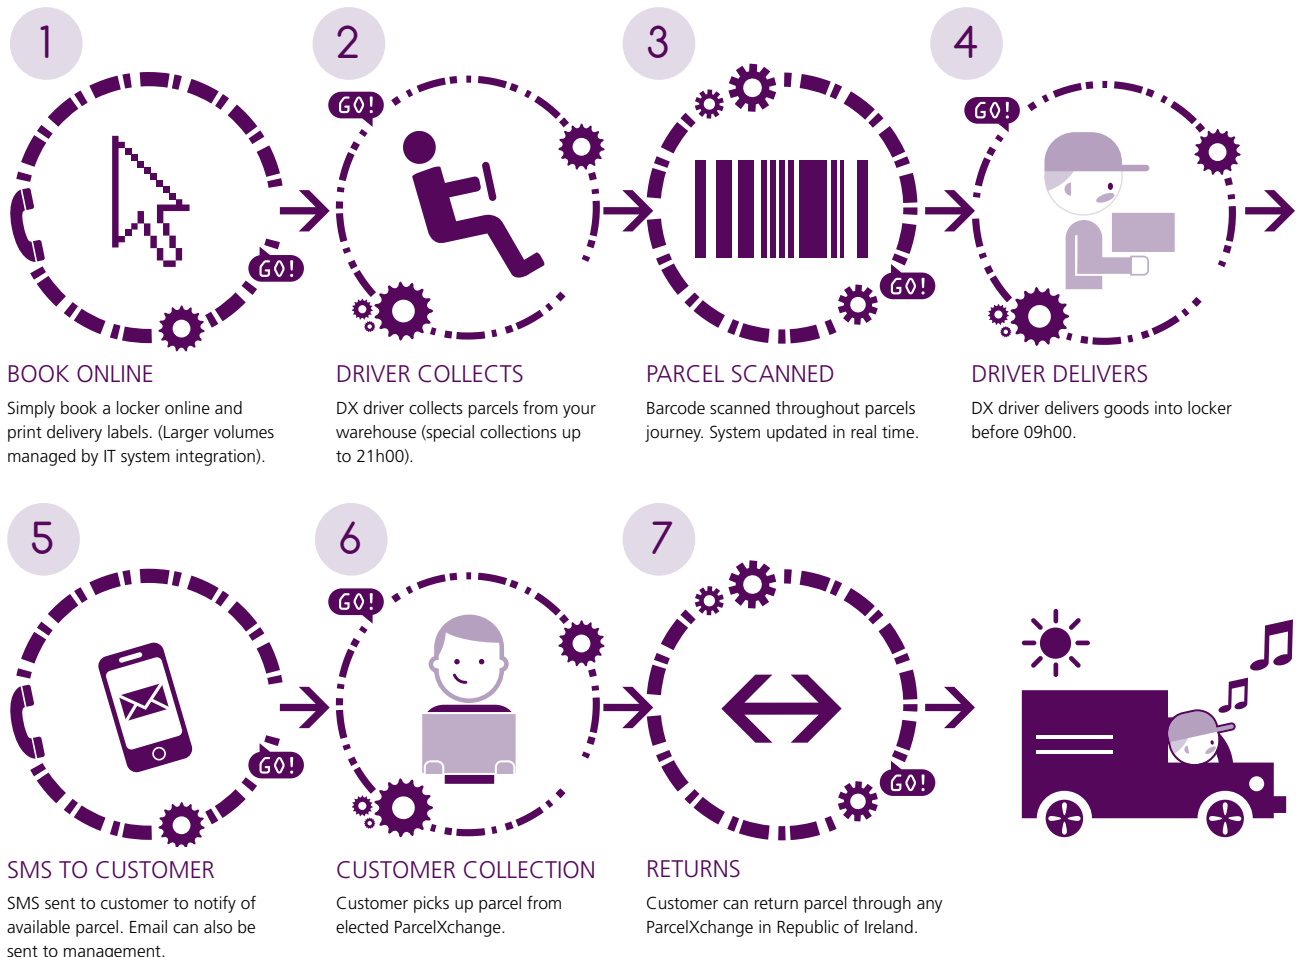

THIS CUTTING EDGE SYSTEM ALSO INCLUDES ↓

- Integrated printer for printing barcodes to initiate the returns logistic journey.
- Real-time scanning throughout the parcels journey.
- External lights activated on a PIR Sensor.
- Individual LED fitted to each locker.
- SMS automatically sent to engineer when parcels have been delivered.
- Delivery reports emailed to management as required.

HERES HOW IT WORKS ↓

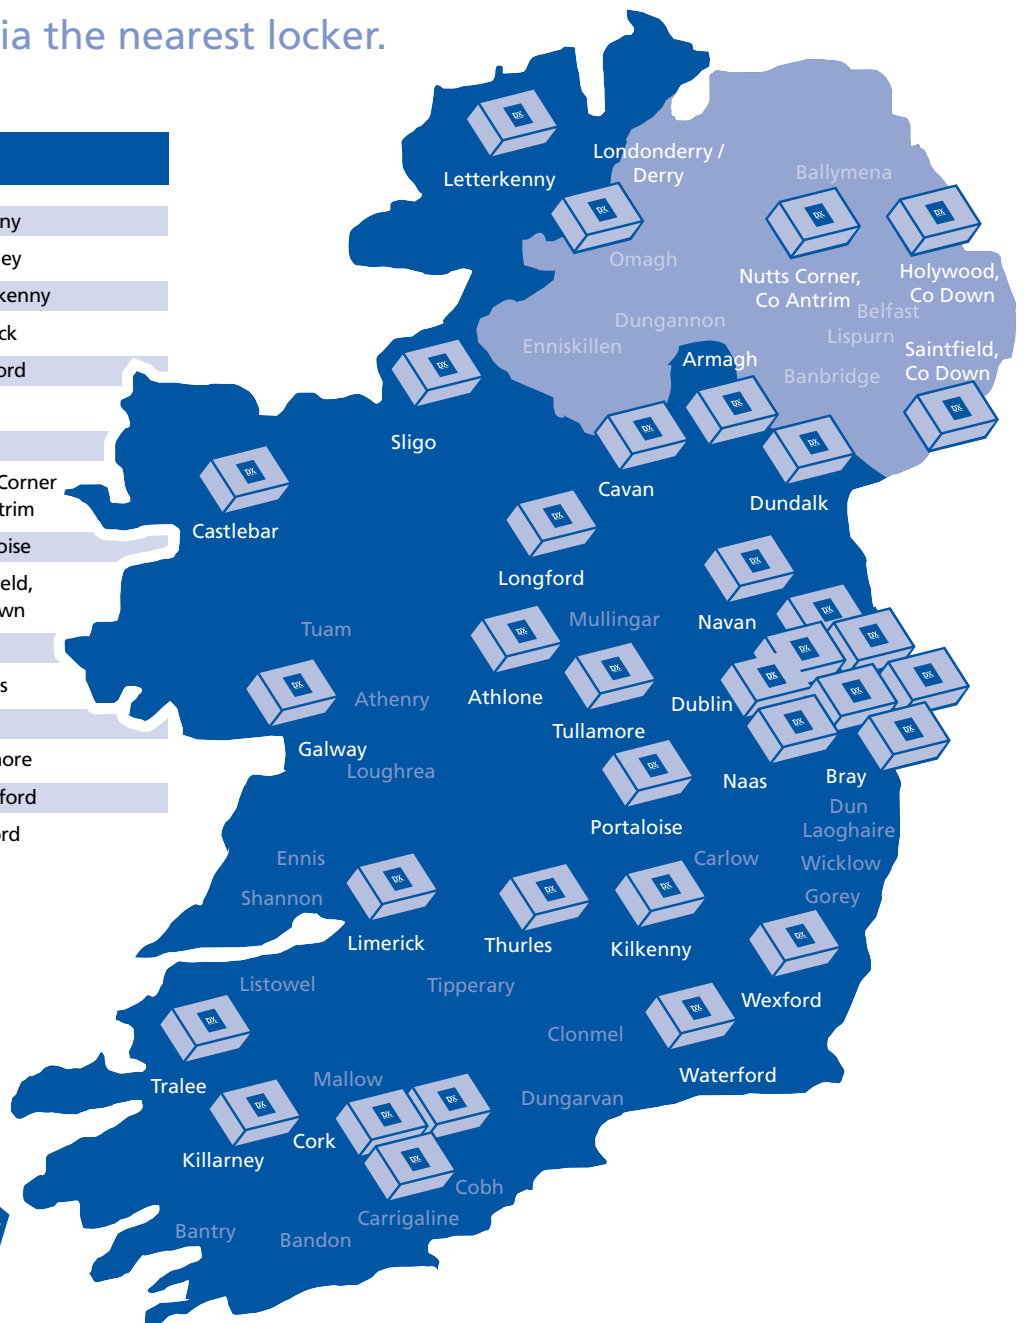

Make Ireland your depot

The advanced technology of ParcelXchange means that in effect you can make the whole of Ireland your depot. Simply route deliveries to your customers or field engineers via the nearest locker.
