DX TRACKED SPECIMEN

The benefits of the DX Tracked Specimen service

The DX Tracked Specimen service is designed to provide an all-inclusive packaging and delivery solution for Category B specimens. Our packaging complies with all current legislation governing the transport of Category B diagnostic specimens, and our stringent health and safety standards ensure that all samples are given the attention and security they require.

Therefore with DX, you can be sure that you are choosing a safe, professional and compliant solution for the movement of your samples.

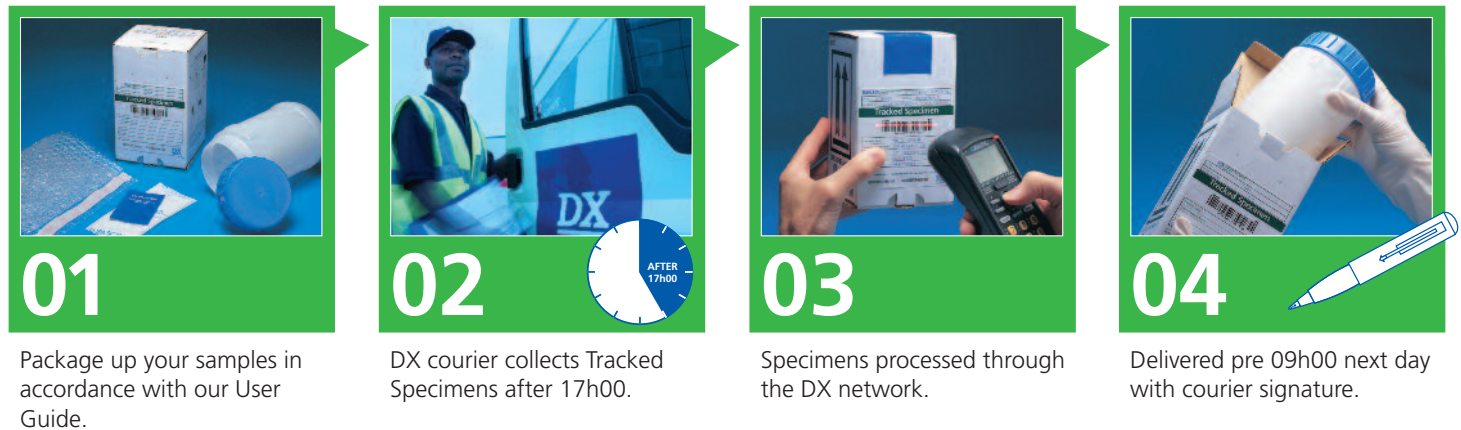

- Packaging complies with IATA packing instruction 602 and 650/UN3373
- All-inclusive charge for packaging and delivery
- Bar-code tracked
- Post 17h00 collection
- Pre 09h00 delivery
- Used packaging collected free of charge and recycled
- Dedicated customer support team

Secure, tracked and reliable

The DX Tracked Specimen service uses a network of collection and delivery points, known as 'Exchanges', located within laboratories and hospitals who are Members of the DX system. We will collect after 17h00 for pre 09h00 delivery the next working day, giving you the advantage of an extended working day. All Tracked Specimen samples will be bar-code tracked with courier signature on delivery, and for extra peace of mind, DX can contact you by email to confirm the items are out for delivery.

A further benefit is that there is no need to weigh or frank Tracked Specimen items, as the packaging and delivery is pre-paid at an all-inclusive price. As part of the service, DX will also collect used DX Tracked Specimen packaging for recycling, proving a solution that is both easy for you and kind to the environment.

How the Tracked Specimen service works

TRUSTED DX SERVICES :
